REDUCING CAR CRIME

Your motor vehicle could be at risk if it is controlled with an electronic key

- Organised criminals are able to steal some of these vehicles in less than 30 seconds.
- They do this by using specialist equipment to programme a blank key that is compatible with the vehicle.
- They do not need the original key. This means that they do not need to steal your key in order to steal your motor vehicle.

To reduce the chances of becoming a victim of keyless vehicle theft, please consider additional security measures:

- Consider using an approved car alarm, steering wheel lock or gearstick lock in addition to your vehicle's own security.
- Consider having an On-Board Diagnostics (OBD) lock professionally fitted to the OBD port.
- Always park your vehicle in a well-lit area, a garage, a staffed car park or an area covered by CCTV.

- Ensure that your vehicle is locked when leaving it, by double checking it is secure.
- Consider purchasing a tracking device, to increase the chances of your vehicle being traced if it is stolen.
